IDENTIFIERS	Common Core of Data Program

ABSTRACT

This report is based on information from the 1990-91 "Public Elementary and Secondary School Universe" and the "Public Elementary and Secondary Education Agency Universe" surveys of education in the United States. The data represent two of the surveys from the Common Core of Data collected annually by the U.S. Department of Education's National Center for Education Statistics (NCES). The tables of this report summarize statistical information for each school and education agency as supplied to the NCES by state education agency officials. The 84,538 public schools reported for 1990-91 represent an increase of 1.3 percent over the previous school year, and the 41,223,804 students represent a 1.7 percent increase in membership from 1989-90. Seventeen tables present information on students and schools by type, by state, and by size and instructional level. Two appendixes provide two sample survey forms, respectively, of the school universe and the education agency universe. (SLD)

Public Elementary and Secondary Schools and Agencies in the United States and Outlying Areas: School Year 1990-91

This report is based on information from the 1990-91 "Public Elementary and Secondary School Universe" and the "Public Elementary and Secondary Education Agency Universe" surveys of education in the United States. These data represent two of the surveys from the Common Core of Data (CCD) collected annually by the U.S. Department of Education's National Center for Education Statistics (NCES). The tables in this report summarize statistical information for each school and education agency as supplied to NCES by state education agency officials.

Highlights

- The 84,538 public schools reported for 1990-91 represent an increase of 1.3 percent over the 83,425 public schools reported for the previous school year. Among the 1990-91 schools, 80,395 (95.1%) were regular schools while 4,143 (5.0%) offered primarily special education, vocational education or some other alternative program.

- The average student body size of public schools was 509 pupils in 1990-91 (compared to 504 in 1989-90). Students in 1990-91 were most likely to be educated in schools with a membership of 300 to 749 pupils, but 0.9 percent of the students were served by schools of fewer than 100 students and 10.0 percent were served in schools with 1,500 or more students. Average school size differed by grade range: 430 students for primary schools; 560 students in middle schools; and 700 students in high schools.

- The total of 41,223,804 public school students reported for 1990-91 is 1.7 percent greater than the 40,526,372 in membership in 1989-90. In 1990-91, 56.5 percent of the students were enrolled in prekindergarten through grade 6, 22.3 percent were in grades 7 through 9, 19.3 percent in grades 10 through 12, and 1.9 percent were in ungraded settings.

- The median pupil-teacher ratio in 1990-91 was 18.2 students for every teacher in primary grades. For middle schools the ratio was 17.0; and 15.1 for high schools.

- The number of regular school districts changed from 15,367 in 1989-90 to 15,358 in 1990-91. Although only 1.2 percent of the districts were in the largest size ranges (membership of 25,000 or more), these districts served some 29.1 percent of the nation's public school students. The average school district enrolled 2,688 students.

Methodology

The sources of data for this report are the "Public Elementary and Secondary School Universe" and the "Public Elementary and Secondary Education Agency Universe." Responses to these surveys were received by NCES from state education agencies in the spring and summer of 1991. The data used here represent information incorporated into the files as of January 27, 1992. Data from the 50 States, the District of Columbia, and five outlying areas are included. Information from the outlying areas is reported in the tables, but is not reflected in the United States totals.

Data for this report were provided by state education agencies from administrative records in their offices. The NCES and the state education agencies work cooperatively to assure comparability between data elements requested and reported. In December of 1990, pre-completed school and agency surveys were sent to each state education agency CCD coordinator (sample survey forms are shown in the appendices to this report). Updated reports were returned by the coordinator to NCES, which edited these submissions to identify missing data or what appeared to be unusually large changes from the previous year's values. Edit reports were then sent to the states for verification or correction, and the CCD coordinators' responses were incorporated in the final data set.

In this report, state totals of student membership are taken from the "State Nonfiscal Survey," while distribution of membership among the various school categories is calculated from individual school records in the "Public Elementary and Secondary School Universe" survey. An exception was made for Guam; no state totals were reported, so the sum of students reported on the "School Universe" is shown as the total for that outlying area.

Assigning Student Counts for Reporting Purposes

Both the school and agency surveys have legitimate records that include no student counts. Schools offering special programs, such as special or vocational education, often operate as adjuncts to regular schools. In these situations, personnel accounting procedures may call for all students—and, in some cases, teachers—to be attributed to the regular school, with the result that the special school has a count of zero. Some regular school districts contract with other agencies to provide services for some students rather than operate schools for these students directly. In this case, student counts are not reported for the receiving district in order to avoid duplication. Conversely, in cases where all students are served by a receiving district, no student counts are reported for the sending district.

Student counts are also generally not attributed to supervisory union administrative centers or regional education service agencies. Some of the tables in this publication include only records with students reported. And, student counts may vary depending upon the survey from which they are reported. For example, state aggregate reports may include students who are not associated with a school district (such as students in some

special schools for the handicapped operated directly by the state) and thus are not reflected in the agency totals. Readers should note this when using data from these tables.

Missing Data

Missing or unavailable data are represented by the symbol "---" in the tables. Data are shown as missing when they are reported by less than 70 percent of the schools or agencies (whichever is the appropriate reporting unit) in a state. This is the case with two characteristics, the racial/ethnic composition of a school's student membership and the number of students eligible for free lunch services. When a data element is missing for one or more states, national aggregate are not computed. However, on table 10 total median pupil-teacher ratios are computed on reporting states.

Definitions and Abbreviations

Alternative education school—A public elementary/secondary school that addresses needs of students which typically cannot be met in a regular school. It provides nontraditional education and may be adjunct to a regular school.

Education agency—Government agency administratively responsible for providing public elementary or secondary instruction, or both, or educational support services.

Federally operated agency—Any elementary, secondary, or combined education program operated by a federal agency (such as the Bureau of Indian Affairs) reported by the state CCD Coordinator.

K—Kindergarten.

Other agency—Any elementary, secondary, or combined education program that cannot be classified appropriately using another CCD designation and that has been reported as such by the state CCD Coordinator. In this report, these are grouped with federally operated agencies.

PK—Prekindergarten.

Public school—Institution that provides educational services, has one or more grade groups (PK-12) or is ungraded, has one or more teachers to give instruction, is located in one or more buildings, has an assigned administrator, receives public funds as primary support, and is operated by an education agency.

Public school membership—The unduplicated count of students on the roll of the school or district (excluding any formally enrolled students who withdrew from school), taken on the school day closest to October 1.

Regional education service agencies (RESA)—Agencies that provide special services to other public elementary and secondary education agencies.

Regular school—A public elementary/secondary school that does not focus primarily on vocational, special, or alternative education.

Regular school districts—Agencies responsible for providing free public elementary and secondary education for school-age children residing within their jurisdiction. These agencies sometimes include special and vocational education in a comprehensive educational setting.

School district—Education agency or administrative unit that operates under a public board of education.

Special education school—Public elementary/secondary school that focuses primarily on special education, including instruction for any of the following: hard of hearing, deaf, speech impaired, health impaired, orthopedically impaired, mentally retarded, seriously emotionally disturbed, multihandicapped, visually handicapped, deaf and blind; and has adapted curriculum, materials, or instruction for students served.

State education agency—The agency of the state charged with primary responsibility for coordinating and supervising public instruction, including the setting of standards for elementary and secondary instruction programs.

State-operated agency—Any elementary, secondary, or combined education program operated by a state agency (such as state schools for the blind or deaf) reported by the state CCD Coordinator.

Supervisory union administrative centers—Agencies that provide administrative services for a group of small school districts.

Vocational education school—Public elementary/secondary school that focuses primarily on vocational education, and provides education and training in one or more semi-skilled or technical occupations.

Acknowledgments

The author gratefully acknowledges the comments and suggestions of the reviewers: Patricia Brown and Mary Frase of the National Center for Education Statistics; and Lisa Solomon of the Council of Chief State School Officers, and JoAnn Davis of the Office of Civil Rights. The author also wishes to express thanks for the contributions of Lee Hoffman, Frank Morgan, Marilyn McMillen and John Sietsema of the National Center for Education Statistics, and Valerie Martin of Pinkerton Computer Consultants, Inc.
